

# Remont v jedrski elektrarni Krško

## Outage at the Krško NPP

Redna vzdrževalna dela v elektrarni trajajo približno en mesec.

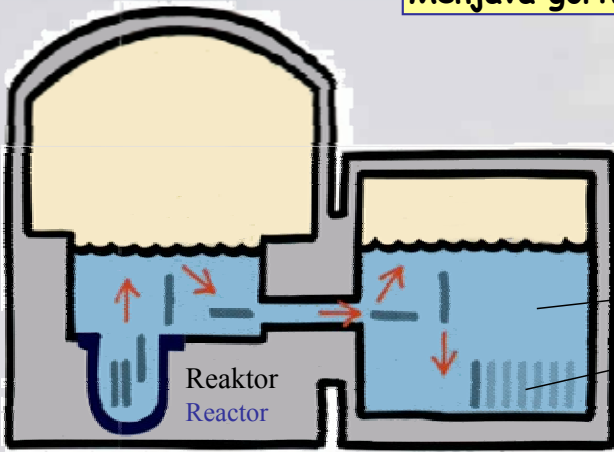

Regular maintenance work at the Krško power plant last approximately one month.

Od leta 2004 dalje se remont izvaja na 18 mesecev.

Since 2004 the outage takes place every 18 months.

### Menjava goriva

### Refueling

Bazen za izrabljeno gorivo  
Spent fuel pit  
Izrabljeni gorivni elementi  
Spent fuel

Izrabljeno gorivo iz reaktorja pod vodo premestijo v bazen za izrabljeno gorivo. V reaktor vstavijo sveže gorivo.

Spent fuel from the reactor is transferred under water to the spent fuel pit, and fresh fuel is inserted into the reactor.

### Vzdrževanje opreme

### Equipment Maintenance

Razstavljena turbina in električni generator med remontom  
Disassembled turbine and electrical generator during an outage

Opremo preverijo in po potrebi zamenjajo.

During an outage, equipment is checked and replaced if necessary.

Rotor črpalke  
Impeller of the pump

Opremo, ki normalno ne obratuje in je v pripravljenosti, testirajo med remontom.

Equipment that is not used during normal operation of the plant is tested during outages.
